EDUCATION

University of Texas at Austin | GPA: 4.00/4.00

Austin, TX

Electrical and Computer Engineering B.S. (Software Engineering & Embedded Systems Tracks)

May 2028

- Activities: IEEE Member
- Relevant Coursework: Computer Architecture, Embedded Systems, Software Design and Implementation

EXPERIENCE

Amazon

May 2026 – August 2026

Software Development Intern

Austin, TX

- Led design and delivery of a production A2A middleware that lets an in-car voice assistant dispatch to remote AI agents with graceful degradation and security-by-default.
- Engineered durable multi-turn state (INPUT_REQUIRED lifecycle + 24h TTL cleanup) and dual SSE/polling transports with OAuth2, reducing response latency 3x (5.6s → 1.8s).
- Fine-tuned an on-device LLM (LoRA) for tool-call routing and validated the stack E2E against third-party cloud agents.

Sonata

June 2025 – July 2025

Software Engineering Intern

Dallas, TX

- Built a custom PII-detection pipeline in Microsoft Presidio that swaps spaCy for Stanford CoreNLP, for approximately 50% memory use.
- Combined regex, pattern recognizers, and an OpenAI GPT-4o fallback to push overall precision to 97% and boost name recall across languages.
- Delivered a Dockerised library with CI tests and Faker-based benchmarks, driving a +14 pt F1 improvement before client hand-off.

Ecoturn

June 2023 – August 2023

Software Engineering Intern

Dallas, TX

- Developed and maintained front-end features using JavaScript, HTML, and CSS for a professional web application.
- Gained hands-on experience in workforce practices, enhancing communication, collaboration, and project management skills in a real-world environment.
- Improved web interface functionality and design, contributing to a user-friendly and efficient platform for client use.

INVOLVEMENT

Pages4Ages

August 2023 – Present

CTO

Flower Mound, TX

- Spearheaded organizational operations as CTO, overseeing book donation drives and community events to promote literacy and education.
- Collected and distributed over 2,500 books, ensuring access to reading materials for underserved populations and driving impactful community change.
- Coordinated volunteer efforts and streamlined logistics for donation events, enhancing operational efficiency and outreach impact.

PROJECTS

Jurn – Screen Time Journaling App | *Swift, SwiftUI, Superwall, Supabase* | [App Link](#)

March 2025

- Built a native iOS journaling app that schedules nightly Screen Time restrictions and unlocks selected apps after users complete a guided reflection.
- Engineered a multi-target Screen Time system using FamilyControls, DeviceActivity, and ManagedSettings to enforce schedules through dedicated monitoring and shield extensions.
- Implemented local-first persistence and cloud synchronization with SwiftData and Supabase, supporting authenticated profiles, mood-based prompts, streak tracking, calendar history, and a home-screen widget.
- Integrated production monetization and attribution using Superwall, StoreKit 2, and AppsFlyer with verified entitlements and durable subscription-conversion tracking.

Laundrify – Smart Laundry Monitoring App | *React Native, TypeScript, Firebase, OpenAI API* | [Github](#)

March 2025

- Built a cross-platform mobile app to monitor laundry machine usage in real time using React Native and Firebase.
- Integrated custom Arduino-based IoT sensors to detect motion and laundry status, sending updates to Firebase Realtime Database.
- Implemented user-focused features including push notifications, floor-based navigation, and a lost item reporting system.
- Developed an in-app chat interface powered by the OpenAI API to provide AI assistance and answer common user queries.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, HTML/CSS, SQL, Kotlin, Swift, LC3

Frameworks/Libraries: React, SwiftUI, Node.js, Flask, Next.js, NumPy, Matplotlib, Tailwind CSS

Developer Tools: Git, Docker, Google Cloud Platform(GCP), Amazon Web Services(AWS), MongoDB, Jupyter

Concepts/OS/Tools: Object-Oriented Programming, Data Structures and Algorithms, Agile Methodologies, Backend, Frontend, Linux, Windows, macOS (OS X), UNIX, Excel
